## SUMMARY

As a highly skilled and motivated fresher, I bring a diverse range of technical expertise to the table, including proficiency in the Laravel framework, C, C++, and Flutter. My knowledge of MVC architecture and project development enables me to create efficient and scalable solutions. Additionally, I am well-versed in SQL and PL/SQL, ensuring seamless database management. As a valuable team player, I possess exceptional soft skills, excelling in collaborative environments and effectively leading teams. I am equally adept at working independently, leveraging my prompt engineering skills to meet tight deadlines and deliver high-quality results. My passion for learning and determination to excel make me a promising asset to any organization, ready to contribute my skills and grow as a dynamic professional.

## PROJECTS

### PORT O CALL

- Port-0-Call is a comprehensive university commute management website in Bangalore.
- It provides a wide range of transport facilities to and from various locations within the city, focusing primarily on students and teachers commuting to and from the university.
- The ride-sharing option enables users to share rides with other members of the university community, promoting cost savings, reduced traffic congestion, and a smaller carbon footprint.
- Real-time vehicle tracking feature allows users to track the location of vehicles, providing updates on the status of their ride in real-time.
- The website offers convenient parking facilities, allowing users to park and pay for their parking spot on a daily basis.
- Carpooling option allows users with cars to pool their vehicles, helping others save money on transportation costs.
- Integration with APIs provides users with recommended travel routes, aiding in trip planning and ensuring timely arrivals at their destinations.
- Overall, Port-0-Call is an innovative and budget-friendly transportation service catering to the university community in Bangalore.
